•	nonprovisional	NO	\$1440	\$300	\$0	\$1740	09/04/2008

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE

Commissioner for Patents P.O. Box 1450 Alexandria, Virginia 22313-1450

or Fax (571)-273-2885

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 681 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 681 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 1/16/2008 has been entered.

- 1. Claims 1-8 and 10-36 have been submitted for reconsideration in view of the prior art references presented in the IDS submitted on 1/16/2008 and Applicant's Request for Continued Examination under 37 CFR 1.114.
- 2. Claims 1-8 and 10-36 are allowed.

Examiner's Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 13 and 25, while *Nguyen* teaches an engine service database as well as generating a baseline model and *McClish* teaches detrended engine data, none of these references taken either alone or in combination with the prior art of record disclose eliminating a smoothing effect to isolate a plurality of deterioration time effects on a measure parameter and then removing the deterioration time effects from a baseline model to generate a detrended baseline model, specifically including:

Art Unit: 2123

(claim 1) "...eliminates the smoothed effect from the initial engine baseline model to isolate a plurality of deterioration time effects on a measured parameter and removes the deterioration time effects from the initial baseline model to generate a detrended baseline model",

(claim 13) "...eliminating the smoothed effect from the initial baseline model to isolate a plurality of deterioration time effects on a measured parameter; and removing the deterioration time effects from the initial engine baseline model to generate a detrended engine baseline model;...",

(claim 25) "...one or more instructions for eliminating the smoothed effect from the initial engine baseline model to isolate a plurality of deterioration time effects on a measured parameter; and one or more instructions for removing the deterioration time effects from the initial engine baseline model to generate a detrended engine baseline model...", in combination with the remaining elements and features of the claimed invention. It is for these reasons that Applicants' invention defines over the prior art of record.

Regarding independent claims 10, 12, 22, 24, 34 and 36 while *Nguyen* teaches an engine service database as well as generating a baseline model and *McClish* teaches detrended engine data, **none of these references taken either alone or in combination with the prior art of record disclose** an engine baseline modeling component that identifies and correlates data from different groups and then combines that data to build a final engine baseline model using regression analysis, specifically including:

(claim 10) "...wherein the engine baseline modeling component identifies correlated groups of engine date based upon the initial baseline model and wherein the engine baseline

Art Unit: 2123

modeling component combines data from correlated groups, and wherein the engine baseline modeling component builds a final engine baseline model from the combined data using regression analysis...",

(claim 12) "...wherein the engine baseline modeling component identifies segments relating to related engines, wherein the engine baseline modeling component smoothes the parameter estimates for each identified related engine segments, and wherein the engine baseline modeling component builds a final model from the average data using regression analysis..."

(claim 22) "...identifying correlated groups of engine data based on the initial engine baseline model; combining data from correlated groups; building a final engine baseline model from the combined data using a regression analysis...",

(claim 24) "...identifying segments relating to related engines, smoothing parameter estimates for each of the related engine segments; building a final engine baseline model from the averaging data using a regression analysis...",

(claim 34) "...one or more instructions for identifying correlated groups of engine data based upon the initial engine baseline model; one or more instructions identifying correlated groups of engine data based upon the initial engine baseline model; one or more instructions for combining data from correlated groups; one or more instructions for building a final engine baseline model from the combined data using regression analysis...",

(claim 36) "...one or more instructions for identifying segments relating to related engines; one or more instructions for smoothing the parameter estimates for each of the identified related engine segments; one or more instructions for building a final engine baseline model from averaged data using a regression analysis...", in combination with the remaining

Application/Control Number: 10/707,655 Page 5

Art Unit: 2123

elements and features of the claimed invention. It is for these reasons that Applicants' invention defines over the prior art of record.

Further and in regards to the reasons for allowance for claims 10, 12, 22, 24, 34 and 36, the Examiner has found Applicants' arguments presented in the 8/22/2007 responses, on pages 14-16 persuasive, more specifically the argument on page 14 that; "Applicant has carefully reviewed the material in Figs. 5 and 6 cited by the Examiner in Nguyen and submit that these Figures do not disclose a data segmenting component that segments engine data into a plurality of groups and an engine baseline modeling component that identifies correlated groups of engine data based upon an initial engine baseline model". The Examiner has found this argument to be persuasive.

Further, and in regards to claims 25-36, the Examiner notes that in Applicants' specification in the section labeled [0045] is disclosed the following; "In the context of this application, the computer-readable medium can be any means that can contain, store, communicate, propagate, transmit or transport instructions..." The claim language in claims 25-36 limits the computer readable medium to the storage medium and excludes any communication medium or any medium that can communicate, propagate, transmit or transport.

- **3.1** Regarding dependent claims 2-8, 11, 14-21, 23, 26-33 and 35 are allowed for at least the reason that they depend upon an allowed base claim.
- 3.2 Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/707,655 Page 6

Conclusion

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Dwin M. Craig whose telephone number is (571) 272-3710. The

examiner can normally be reached on 10:00 - 6:00 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Paul L. Rodriguez can be reached on (571) 272-3753. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
